

What is claimed is:

1 1(currently amended). A wall mounting for ~~detachably mounting~~ a
2 shower head, comprising:
3 **a shower head having a shower head housing and a grip by which**
4 **the shower head can be directed manually;**
5 a holder for the shower head wherein the holder is attachable to a wall
6 and configured for engaging a location on a housing of the shower head
7 provided for mounting the shower head, the holder acting by means of an
8 interference fit along withdrawal and introduction directions of the shower
9 head;
10 wherein the holder engages on the housing of the shower head by a
11 pair of jaws gripping an outer perimeter of the housing of the shower head
12 between two diametrically opposed locations on the housing of the shower
13 head, ~~such that the shower head is , and, wherein the shower head is~~
14 operational **to emit water while the housing is engaged** in the holder, and
15 **wherein the shower head** remains operational **for manual direction of the**
16 **water** when withdrawn from the mounting **and held by the grip.**

2-6(canceled).

1 7(previously presented). A wall mounting according to claim 1,
2 wherein the jaws are drawn toward one another when the shower head is in
3 place therein.

1 8(previously presented). A wall mounting according to claim 1,
2 wherein the pair of jaws are joined to the holder for the shower head by a
3 component that is under tension.

1 9(previously presented). A wall mounting according to claim 8,
2 wherein the tensioning component is configured such that it contacts the
3 housing of the shower head over an extended area.

10(canceled).

1 11(previously presented). A wall mounting according to claim 1,
2 wherein the holder for the shower head is arranged between tines of a fork.

12-13(canceled).

1 14(previously presented). A wall mounting according to claim 1,
2 wherein the housing of the shower head is disk-shaped.
